DETAILED ACTION

1. Claims 1-29 are pending in this application filed 03/13/01.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to an automated method for processing loans, classified in class 705, subclass 38.
 - II. Claims 20-29, drawn to providing verbal requests for information and verbal loan application related commands in a network, classified in class 705, subclass 1.

Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I has an automated method for processing the loans. The subcombination Group II has separate utility such as providing verbal requests for information and verbal loan application related commands in a network and converting the voice inputs into a digital form for processing by a first mechanism.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
